Results-driven Senior Frontend Developer with extensive experience in engineering scalable frontend architectures using Javascript (Vue.js and Angular). Adept at elevating coding standards through rigorous testing and peer reviews while implementing Agile best practices. Ambitious and proactive, I am deeply committed to continuous learning and professional growth, constantly seeking to absorb knowledge from my environment. Proven mentor, fostering technical growth within teams and driving delivery efficiencies. Strong expertise in microservices integration and responsive design. Currently pursuing a Bachelor's Degree in Computer Engineering.

Skills

- Javascript / Typescript
- Vue.js
- Angular
- Unit Testing (Jest/Vitest)
- State Management (Pinia - Vuex)
- SOLID Principles
- Design Patterns
- Microfrontends
- Code refactoring
- SASS/SCSS
- Web Performance
- Vite / Webpack
- CI/CD
- Technical Mentoring
- Agile methodology

Work experience

Senior Frontend Developer
Amadeus, Barcelona

May 2023
Current

- **Engineering scalable frontend architectures** using **[Angular/React/Vue]** for the travel sector, ensuring high availability and performance for mission-critical applications.
- **Elevating code standards** through the implementation of comprehensive testing suites (**Jest, Cypress**) and rigorous peer code reviews to minimize technical debt.
- **Driving Agile best practices** within the team to streamline delivery pipelines and improve sprint velocity.
- **Mentoring junior developers and interns**, accelerating their technical onboarding and fostering a collaborative engineering culture.

Front Web Developer
Technology 2 Client (T2C), Barcelona

November 2020
May 2023

- **Developed** a client-facing application from scratch using **Vue.js**, adhering to **Agile** methodologies and **GitLab** workflows.
- **Executed the migration** of the codebase from **Vue 2 to Vue 3**, ensuring seamless functionality and improved modern standards.
- **Integrated** the frontend with a **microservices architecture** via REST APIs and managed complex application state using **Vuex**.
- **Built** responsive and modular user interfaces using **SCSS** and **Tailwind CSS**.
- **Supported the growth of junior developers** by defining technical tasks based on use cases and conducting code reviews to ensure quality.

Full Stack Web Developer
Quantion

June 2019

July 2020

- **Contributed to the full-stack development** and maintenance of a large-scale application for a final client using **Angular** and **Node.js (v14)**.
- **Participated in a major codebase migration**, updating the frontend framework from **Angular 5 to Angular 8** to modernize the application.
- **Wrote and maintained unit tests** using **Mocha** and **Jasmine**, ensuring code reliability and preventing regressions.
- **Collaborated in an Agile environment**, gaining strong foundations in Scrum methodologies, teamwork, and version control workflows with **GitHub**.

Java Developer
Sigma

October 2018

September 2019

- Programming with JAVA 6 (an internal framework of the company).
- 4 month as a practice and another 4 moth as junior JAVA developer.

Education

Bachelor's Degree in Computer Engineering
UOC Universitat Oberta de Catalunya), Online

2023

Current

Master Blockchain: Programming, Taxation and CryptoSecurity
Campus internacional de Blockchain, Online, Spain

2020

2021

Superior grade: Web applications development
La Salle Gracia, Barcelona, Spain

2017

2020

Intermediate Grade: Computer Systems and Networks
Jaume Viladoms, Sabadell, Spain

2015

2017

Early Childhood Education, Primary Education, Secondary Education
Los Franciscanos, Sabadell, Spain

2003

2015
